SUMMARY

Full-Stack Developer with experience building and deploying web applications using React, Next.js, NestJS, TypeScript, and PostgreSQL. Contributed to a Meghalaya Government-sponsored application that reached 2,000+ users and 1,000+ bookings within the first month of its launch, working across ordering, payments, authentication, APIs, and performance optimization.

EXPERIENCE

Frontend Developer Intern

Onlybees Pvt. Ltd., Feb 2026 – Jun 2026

React.js, TypeScript, NestJS, PostgreSQL, Tailwind CSS

[Certificate of Completion](#)

- Took on full-stack responsibilities beyond the Frontend Developer Intern role, contributing to a Meghalaya Government-sponsored D2C application from MVP to production and helping deliver a platform serving 2,000+ users and 1,000+ bookings.
- Built the ordering and booking system end to end, with order locking to prevent overselling under concurrent demand, and integrated payment gateway workflows, location polling, and support ticketing into production.
- Implemented REST APIs and business logic in NestJS, TypeScript, Prisma ORM, and PostgreSQL, powering API-integrated forms and feature delivery.
- Built custom CRM workflows for sensitive KYC data, implementing role-based access control, authentication, and verification flows to keep access secure and compliant with data handling standards.
- Improved application performance by reducing landing page load time by 107 ms and eliminating redundant API calls through TanStack Query caching, background refetching, and query invalidation.
- Built reusable Next.js and Tailwind CSS components for customer-facing browsing, ordering, and payment interfaces integrated with NestJS REST APIs.

PROJECTS

Slaysuki – D2C E-commerce Platform

Next.js, NestJS, PostgreSQL, Prisma ORM, Razorpay, Tailwind CSS

[Live Website](#)

- Building a full-stack D2C e-commerce platform with authentication, inventory management, cart, checkout, order management, and payment workflows.
- Implementing inventory reservation and order-locking workflows to handle concurrent purchases and prevent overselling limited inventory products.
- Developing unit and end-to-end tests using Jest and Playwright for checkout and order-locking flows, with AI-assisted test generation followed by manual review.
- Self-hosting the application on a Linux VPS, managing server configuration, environment setup, deployment, and infrastructure.

ZestQuiz – AI-Powered Quiz Platform

Next.js, NestJS, PostgreSQL, Prisma ORM, DeepSeek API

[Live Website](#) | [GitHub](#)

- Built a full-stack quiz platform with JWT-based role authentication, quiz creation and management, results and analytics, and an admin dashboard.
- Integrated DeepSeek AI for automated quiz generation and developed a separate AI chat support feature with REST APIs and persistent conversation history.

Entertainment Journalist Portfolio

Next.js, PostgreSQL, Prisma ORM, Tailwind CSS, BlockNote

[Live Website](#) | [GitHub](#)

- Designed and built an end-to-end portfolio and publishing platform for a working entertainment journalist, with authentication and cloud-based media management supporting the client's editorial workflow.
- Built a block-based article editor with BlockNote and integrated it into a custom CMS, enabling the client to publish and edit articles independently through the admin dashboard.

EDUCATION

Master of Computer Applications (MCA)

Sister Nivedita University, Kolkata (2024 – 2026)

CGPA: 7.50

Bachelor of Computer Applications (BCA)

University of Engineering and Management, Kolkata (2021 – 2024)

CGPA: 9.03

SKILLS

- **Languages:** JavaScript, TypeScript, SQL
- **Frontend:** React.js, Next.js, Tailwind CSS, TanStack Query, Framer Motion, HTML, CSS
- **Backend:** Node.js, NestJS, Express.js, Prisma ORM, REST APIs
- **Databases:** PostgreSQL, Supabase, NeonDB
- **Other:** Docker, Git, Linux, Vercel, Cloudflare, Figma
